

Digitalization starts with the internal systems in the company with its assets, processes, and resources. Yield higher profit and return of investment through sustainable tech upgrades.

One Commerce has streamlined solutions for a business' quicker transition from outdated processes to innovative best practices. Digitalization is rolled into one convenient package for enterprises by binding essential network and cybersecurity infrastructure, power facilities and connectivity.

Network and Cybersecurity

- Network Infrastructure Solution (LAN Switches, Next-Gen Firewall)
- Hyper-converged Infrastructure (HCI)
- Hybrid Cloud
- Integrated Physical Security Solutions (Access, CCTV, FDAS)
- Smart Modular Data Center Facility
- Smart Buildings
- Data Security Protection
- NDR/EDR/EXR/Endpoint Detection Response
- SASE - Secure Access Service Edge
- Intelligent Board
- Unified Communications
- Document Management System
- Innovative Retail Solution
- Business Operation Software
- Robotic Process Automation
- Managed Services

Complementary Connectivity

- Li-Fi
- Access Points

Fiber Connectivity

- Microduct
- Microfiber

Efficient Data Transmission

- Point-to-Multipoint Radios

Physical Security and Back-up Power

- Uninterruptible Power Supply (UPS)

Defense

- Portable Weigh-in-Motion

Digital Transformation for Commercial Stability

ABOUT ONE COMMERCE (INT'L) CORPORATION

With network connectivity fully embedded in its DNA, One Commerce (Int'l.) Corporation is one of the largest and leading systems integrators in the Philippines that provides full turnkey end-to-end solutions.

One of the first local systems integrators to receive an ISO certificate SEVEN (7) years in a row and consistently accredited by regulatory bodies.

Comprised of 400 passionate engineers, account and project managers, and backhaul personnel with a passion for innovation.

Composed of technology houses with their respective competencies: wireless access, transmission, remote management system, power and facilities, ICT, and outside plant services.

Network and Cybersecurity			Complementary Connectivity		
<p>Network Infrastructure Solution</p> <p>Hyper-converged Infrastructure</p> <p>Hybrid Cloud</p>		<p>Dig into digitalization through a network refresh with advanced on-premise components and cloud infrastructure</p>	<p>Li-Fi</p> <p>Access Points</p>		<p>Li-Fi is complementary to existing access points, this is ideal to be positioned to hotels because of its design.</p> <p>Enable seamless internet access and facilitate communication and collaboration.</p>
<p>Integrated Physical Security Solutions (Access, CCTV, FDAS)</p> <p>Smart Modular Data Center Facility</p> <p>Smart Buildings</p>		<p>Ensure the safety of personnel, protect critical infrastructure, and prevent damage to valuable equipment</p>	<p>Fiber Connectivity</p> <p>Microduct & Microfiber</p>		<p>Best for office buildings, subdivision, condominium -- FTTH application as we already have deployments for these.</p>
<p>Data Security Protection</p> <p>EDR - Endpoint Detection Response</p> <p>SASE - Secure Access Service Edge</p>		<p>Prevent incidents of unauthorized access, hacking, data breach through end-to-end cybersecurity solutions - securing every endpoint in your system.</p>	<p>Physical Security and Back-up Power</p> <p>UPS (Uninterruptible Power Supply)</p>		<p>Avoid power outages by using an energy saving system</p>
<p>Intelligent Board</p> <p>Unified Communications</p>		<p>Keep communication lines open by utilizing multiple channels of messaging and meetings.</p>	<p>Efficient Data Transmission</p> <p>Point-to-Multipoint Radios</p>		<p>For multiple buildings can deploy P2MP radios to provide seamless and high-speed wireless connectivity across the entire campus. This supports employee mobility and facilitates communication and collaboration.</p>
<p>Document Management System</p> <p>Innovative Retail Solution</p> <p>Business Operation Software</p> <p>Robotic Process Automation</p> <p>NICE</p>		<p>Propel your productivity through business applications that are user-friendly and tailored to your needs for design, documentation, and automation.</p>	<p>Defense</p> <p>Portable Weigh-in-Motion</p>		<p>For Construction Sites, Temporary Events, Agriculture & Farming, Temporary Loading and Unloading Zones, Emergency Response, Military and Roadside Operations to monitor the weight of vehicles delivering equipment, stages, or materials. This ensures that vehicles comply with weight limits and helps prevent damage to event venues. This also helps ensure compliance with weight restrictions and prevents potential damage to roads</p>
<p>Managed Services</p>		<p>Rent out the equipment and bundle it with technical support and managed services where you can pay as you consume</p> <p>Avail these services and equipment: Consultancy, Laptop, WLAN, Network, Cloud Service Management, and Network Operations Center</p>
